VELUPPU NOI - ANAEMIA

Definition

Anaemia is present when the haemoglobin level in the blood is below the lower extreme of the normal range for the age and sex of the individual. In Siddha system of Medicine it can be correlated with *Veluppu noi* (Syn. *Paandu*). It is characterized by Pallor of skin, conjunctiva and nail bed.

Causes

- Overt blood loss (*Athiga kuruthi pokku*) – Epistaxis (*Mookil kuruthi vadithal*), Menorrhagia (*Perumbadu*), Haemophilia (*Kuruthiazhal*), Bleeding piles (*Kuruthi moolam*)
- Inadequate diet (*Unavaadhi kutrangal*)
- Hook worm infestation (*Vayitru puzhu*)
- Malaria (*Murai suram*)
- Chronic diseases like T.B (*Illaippu noi*), HIV infection and AIDS (*Mega vettai*)
- Liver disorders (*Kalleeral noi*)
- Renal disorders (*Siruneeraga noigal*)
- Pica (Habit of eating ash, mud etc.)

Apart from these, Siddha system emphasizes that excessive intake of salt and sour taste results in anaemia.

Preventive Measures

- Ensure personal hygiene to avoid worm infestations.
- Increase the intake of fresh green leafy vegetables, fruits and bright coloured vegetables.
- Take iron and vitamins rich diet.
- Always prefer unpolished rice, wheat etc. than polished varieties.
- Reduce the intake of tea or coffee with meals, aerated drinks.
- Avoid excess intake of milk.

Health Promoting Tips

- Exercise regularly
- Practice yogasanam and pranayamam
